WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture
Economic Research Service
Foreign Agricultural Service

Approved by the World Agricultural Outlook Board

WASDE-275 - February 10, 1993

HIGHLIGHTS

U.S. wheat stocks next June 1 are indicated at 506 million bushels, up 20 million from last month because of a little weaker food use and higher imports, but the second lowest stocks since 1975. Projected U.S. corn stocks of 2,237 million bushels are 10 million below a month ago due to marginally higher domestic use.

Projected U.S. soybean stocks remain at 355 million bushels, while expected soybean oil stocks are up slightly. Cotton stocks next August 1 of 4.2 million bales are 0.2 million below last month because of improved export prospects. Carryover sugar stocks are placed at 1.46 million short tons, up 0.1 million from last month, mainly because of higher beginning stocks resulting from revisions in 1991/92 supply and demand estimates.

The U.S. livestock and poultry outlook this month shows little change in 1993 meat production, which is 3 percent more than last year's record high. Cattle and hog prices remain relatively strong.

GRAINS

WHEAT. Global 1992/93 wheat supply is up slightly from last month, mainly because of larger-than-expected yields for Argentina and Australia. The resulting larger projected exports for Australia and Argentina are more than offset by reduced export prospects for Canada and Turkey. On the import side, projected imports for China are down because of the continued slow pace of purchases to date. Projected imports for the former Soviet Union (FSU) are unchanged from last month.

Projected U.S. 1992/93 wheat ending stocks are up 20 million bushels from last month because of lower forecast food use and higher expected imports. The projected price range has been narrowed to $3.25 to $3.35 per bushel.

COARSE GRAINS. World 1992/93 supply and use projections are up from last month. Larger crops in the FSU, Brazil and Argentina are the major production changes. Higher projected corn exports for Argentina and the EC are being largely matched by increased imports for a number of countries.

Projected U.S. 1992/93 food, seed and industrial use of corn is up 10 million bushels but down 5 million bushels each for barley and oats. These changes are reflected in projected ending stocks. The projected price range for corn is unchanged at $1.90 to $2.20 per bushel.

RICE. Projected 1992/93 global rice production and consumption are up marginally from last month, while ending stocks are down. Projected global trade is up slightly as larger expected exports by Burma and China more than offset a drop in projected exports for Thailand.

U.S. 1992/93 supply and use projections are largely unchanged from last month. The projected price is up 10 cents on each end to $5.95 to $6.45 per cwt.

OILSEEDS

World oilseed production is forecast at a record 224.7 million metric tons, down slightly from a month ago but up less than 1 percent from the year-earlier level. U.S. production is unchanged at 68.7 million tons, up 7 percent from last year. Foreign production is off slightly at 156.0 million tons, 2 percent below last year's record outturn. Foreign soybean production increases this month are more than offset by reductions in Pakistan's cottonseed output and FSU sunflowerseed production. World soybean production is forecast at a record 114.4 million tons, up 1 percent from last month and 7 percent from last year. Most of the gain is in Brazil, where expanded acreage and good yield prospects are boosting forecast production by 0.8 million tons, to 20.8 million. Yields in Brazil have been helped by more input applications and generally favorable growing conditions. Some dryness in December was more than compensated for by good rains in January and generally mild temperatures.

World soybean crush and exports are increased this month, mostly in response to larger availability from Brazil and increased imports for a few countries, including Japan. Soybean use in Japan as well as in Europe continues to benefit from the shortfall in rapeseed crops in Canada and Europe. Estimates of U.S. exports of soybeans and soybean meal are unchanged.

World trade in soybean oil is largely unchanged this month as larger exports for Brazil offset reduced U.S. exports, forecast at 0.8 million tons.

Season-average U.S. prices for soybeans are increased slightly this month to $5.40 to $5.55 per bushel, compared with last year's $5.58 per bushel. Soybean meal prices are unchanged at $170 to $190 per short ton, 48 percent crude protein content. Soybean oil prices are down slightly from last month at 20.0 to 22.0 cents per pound in response to lower exports and larger soybean oil stock prospects.

COTTON

This month's global cotton outlook for 1992/93 is highlighted by reduced stocks stemming from a further downward revision in production. Output is projected at 84 million bales, 2 percent below a month ago, primarily resulting from a 17-percent reduction in the crop estimate for Pakistan. World consumption is also revised down nearly 1 percent to 85 million bales, mainly reflecting a 2.5-percent downward revision in the forecast for India. Global imports and exports are projected at 22.4 million bales. Although total trade is about unchanged from January indications, exports by India, the FSU and the United States are revised up in light of the sharply reduced export outlook for Pakistan. Prospective world ending stocks of 39.4 million bales are down 3 percent from both last month and the beginning stock level. China accounts for one-third of these stocks. Outside China, stocks of 26 million bales equal 41 percent of prospective use, near the average of the past decade.

U.S. cotton ending stocks for 1992/93 also are projected lower this month as improved exports boost prospective use. The export forecast of 6.2 million bales is 3 percent above a month earlier, reflecting reduced competitive supplies abroad, particularly in Pakistan. This season's carryover is expected to total 4.2 million bales, 5 percent below month-earlier prospects, but still 13 percent above beginning stocks.

SUGAR

Projected U.S. sugar production in fiscal year 1992/93 is 7.6 million short tons, raw value, unchanged from last month. Supply and demand estimates for 1991/92 are revised to bring them into line with estimates recently published by USDA's Agricultural Stabilization and Conservation Service in the Sweetener Market Data Yearbook, and with final quota and quota-exempt trade data from the U.S. Customs Service.

The ending stocks estimate, up 93,000 tons, is the most significant revision for 1991/92. Production is lower because of a reduced production estimate for Hawaii of 688,000 tons. The 1991/92 estimate for imports under quota includes 8,700 tons of 1990/91 quota sugar which did not enter until October 1991.

For 1992/93, beginning stocks are raised, the "miscellaneous" residual factor is cut to zero, and ending stocks are further raised. The deliveries forecast is maintained at 9.025 million tons, up 1.8 percent from the revised 1991/92 estimate.

LIVESTOCK, POULTRY AND DAIRY

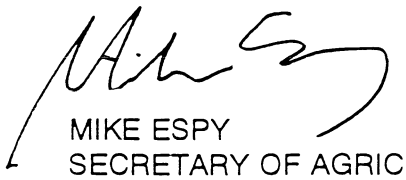

The recent Cattle on Feed report showed a 7-percent increase in the number of cattle on feed January 1. The movement of cattle into feedlots was particularly large in late 1992. Based on the sharp increase in feedlot inventories, fed cattle marketings should pick up in late winter and push first-quarter beef production a little above previous expectations. Steer prices have been stronger than anticipated, but they are expected to weaken with the pickup in fed cattle marketings. The Cattle report released last week showed the January 1, 1993, inventory of all cattle and calves up 1 percent from a year ago. This report also indicates that a modest expansion in the inventory will continue this year.

Broiler meat exports have been larger than expected and with improved prospects for 1993 the forecast is increased. Supply, use and price forecasts for the other meats are little changed from last month.

The National Agricultural Statistics Service recently made an upward revision in the level of egg production for 1991 and 1992. Based on this higher level of production, the egg output forecast for 1993 is increased slightly.

The milk supply, use and price forecasts are unchanged from last month.

APPROVED:

MIKE ESPY
SECRETARY OF AGRICULTURE

Yield (pounds/acre)	6,370	6,426	6,738	6,738
Beginning stocks (mil. cwt)	11.6	11.7	12.9	12.9
Production	48.3	48.3	51.0	51.0
Supply, total 5/	60.4	60.5	64.6	64.6
Domestic & residual 3/	33.8	32.2	34.5	34.5
Exports	14.9	15.4	15.5	15.5
Use, total	48.8	47.6	50.0	50.0
Ending stocks	11.7	12.9	14.6	14.6

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 1990/91, 1.4; 1991/92, 1.4; 1992/93, 1.4. 3/ Residual includes unreported use, processing losses and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Marketing-year weighted average price received by farmers. 5/ Includes imports.

Note: Reliability calculations at end of report.
1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and Paraguay. 4/ Japan and EC-12, (includes former German Democratic Republic).

1/ Fiscal years beginning Oct. 1. Puerto Rico not included. 2/ Historical data are from ASCS, "Sweetener Market Data" and NASS, "Sugar Market Statistics." 3/ Actual arrivals under the quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. The tariff rate quota for 1992/93 was set at 1,357,000 short tons. Estimated arrivals assume a shortfall of 30,000 tons. 4/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty), plus arrivals from Puerto Rico. Imports of flavored sugar and products with very high sugar content such as tea mixes, gelatin, and miscellaneous food preparations are not included. The sugar content of imports of these products is estimated at about 110,000 STRV in 1991/92. 5/ Includes shipments to Puerto Rico. Other exports are mostly reexports. 6/ Transfer to sugar containing products for reexport, for polyhydric alcohol, and feed. 7/ CCC disposal for domestic nonfood use, refining loss/gain adjustment, and residual.

Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 29-31 present a 11-year record of the differences between the February projection and the final estimate. Using world wheat production as an example, changes between the February projection and the final estimate have averaged 2.8 million tons (0.6%) ranging from -7.3 to 6.8 million tons. The February projection has been below the estimate 8 times and above 3 times.
