WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture
Economic Research Service
Foreign Agricultural Service

Approved by the World Agricultural Outlook Board

WASDE-282 - September 9, 1993

HIGHLIGHTS

Except for soybeans, U.S. crop prospects slipped over the past month, reflecting damage from weather, disease and insects. Prospective stocks have been trimmed for corn and cotton but increased for wheat and soybeans.

Prospective 1993/94 U.S. wheat ending stocks of 708 million bushels are up slightly from a month ago, and are about one-third above relatively low stocks last June 1. Stocks in relation to use would be above average. Projected corn stocks of 1,340 million bushels are down from last month and nearly 40 percent below estimated carryin stocks, with the stocks-to-use ratio below average. Expected soybean stocks, at 215 million bushels, are above last month but one-fourth below estimated 1993/94 carryin stocks, and stocks in relation to use are below average. Carryover cotton stocks of 6 million bales are down from last month but above average in relation to use. Sugar stocks for 1993/94 continue to be projected well below average.

U.S. meat production still is forecast nearly 2 percent higher in calendar year 1993, with slightly larger broiler output this month almost offsetting a little less red meat. A further gain of around 3.5 percent in meat production is projected for 1994.

GRAINS

WHEAT. Projected 1993/94 global wheat production is little changed from last month, but trade and use are down and ending stocks are higher. Projected foreign output is higher than last month as larger production in Ukraine, Canada and Russia more than offsets smaller prospective crops in the EC. With the larger crops, prospective imports are down for Russia and Ukraine. Also, forecast exports are raised 1 million tons for Russia. The lower projected world demand results in lower prospective exports for the United States, Australia, the EC and Canada.

Forecast U.S. wheat production is down 62 million bushels from last month because of a lower prospective spring wheat crop. Projected total use in 1993/94 is down 75 million bushels as domestic use is down 50 million bushels and exports, 25 million. Thus projected 1993/94 ending stocks are up 13 million bushels from last month. However, with stronger than expected prices so far this marketing year, the projected price range is up 15 cents on the low end and 5 cents on the high end to $2.70-$3.00 per bushel.

COARSE GRAINS. Projected global 1993/94 supply, use and ending stocks of coarse grains are up from last month, despite lower U.S. crops. Foreign production is up substantially from last month, led by gains in India, Canada, Russia and Europe. Despite larger projected consumption, the relatively large increase in foreign production results in higher projected 1993/94 global ending stocks. However, stocks still remain well below a year earlier.

U.S. 1993/94 corn production is forecast at 7.23 billion bushels, down 194 million from last month and 2.25 billion below last year's record crop. Forecast output of barley also is down from last month, leaving total feed grain production 2.5 percent below last month and down 23 percent from 1992/93. Projected U.S. corn exports are down 75 million bushels because of larger forecast exports for South Africa, Argentina and the EC. Thus, projected 1993/94 corn ending stocks are down 68 million bushels from last month. The projected price range for corn is unchanged at $2.15 to $2.55 per bushel.

RICE. Projected global 1993/94 rice supply, use and ending stocks are down slightly from last month, while trade is up marginally. The smaller output is mainly due to a decline in forecast output for Japan. U.S. 1993/94 supplies are projected higher than last month in spite of a smaller forecast crop because of larger carryin stocks and imports. Domestic and residual use are lower, while exports and ending stocks are projected higher. The reported 1992/93 ending stocks are higher than forecast last month, resulting in a lower 1992/93 domestic and residual use estimate.

OILSEEDS

World oilseed production for 1993/94 is projected at 226.0 million tons, down less than 1 percent from last month and last year. Foreign production is essentially unchanged from last month but up 4 percent from last year, to 164.4 million tons. Production prospects are higher for India's soybeans and Canada's rapeseed, but lower for cottonseed in China and peanuts in India. Favorable growing conditions for summer crops in India contributed to a significant jump in prospective soybean yields, complementing larger area estimates. In the United States, oilseed crop production is cut slightly to 61.6 million tons as dry weather has hurt peanut and cotton crop yields. The U.S. soybean production forecast, based on survey results around September 1, is raised sightly to 52.0 million tons.

Slow gains in prospective global use and expanded supplies of soybeans and rapeseed in key exporting countries are reducing 1993/94 U.S. export prospects for soybeans and soybean meal. U.S. soybean exports are projected at 17.6 million tons, down 2 percent from last month and 17 percent from last year. Soybean meal exports are projected nearly 5 percent below a month ago and 13 percent below a year earlier. Reduced soybean meal exports account for a 1-percent decline in crush from last month.

Season-average prices for soybeans and soybean meal are projected slightly lower this month, while soybean oil prices are slightly higher because of tightening soybean oil inventories.

COTTON

Global cotton stocks for 1993/94 are revised down significantly this month, primarily reflecting a further reduction in 1993 crop prospects. Production is projected at 83 million bales, nearly 3 percent below August indications, reflecting smaller crops for China, the United States and Turkey. Output in China is placed at 17.5 million bales, 8 percent below earlier indications due to smaller area. Global consumption is revised up slightly to 87.4 million bales as prospects improve in Turkey and India. World trade prospects remain near last month's projection of nearly 27 million bales. Ending stocks for 1993/94 are trimmed 7 percent this month to 33.2 million bales, with China accounting for most of the decline.

Highlighting this month's changes in the U.S. cotton outlook for 1993/94 are a 4-percent decline in crop prospects and the consequent reduction in carryover stocks. Despite the

decline, U.S. production of 17.9 million bales surpasses China's as the world's largest. With mill use and export projections remaining at 10.3 and 6.3 million bales, respectively, this season's U.S. ending stocks are placed at 6 million bales, compared with 6.6 million last month.

SUGAR

U.S. sugar production in fiscal year 1993/94 is projected at 7.53 million short tons, raw value, down 20,000 tons from last month. The revised projection is based on NASS sugar beet and sugarcane production forecasts. Lower sugar beet yields in Minnesota and North Dakota because of wet weather are responsible for the lower production. U.S. imports of sugar under the tariff rate quota in 1992/93 are likely to reach 1.29 million tons, leaving only 1.21 million tons available for entry in 1993/94. The transfer of sugar to products for reexport is forecast at 120,000 tons in 1992/93 and 130,000 tons in 1993/94.

Marketing allotments for fiscal year 1992/93 were imposed on July 1, 1993. The final allotment for beet sugar is 188,000 tons less than estimated beet sugar production. Exports of sugar in excess of allotments are forecast at 30,000 tons. Thus, about 158,000 tons of 1992/93 ending stocks will consist of beet sugar in excess of allotments. If these stocks are excluded, the stocks-to-use ratio in 1992/93 is 15.0 percent. No allotments are assumed for the 1993/94 projections. Ending stocks in 1993/94 are forecast at 1.2 million tons, the lowest level since 1989/90.

LIVESTOCK, POULTRY AND DAIRY

The number of hogs slaughtered is lagging expectations and heavier than estimated average weights have not been offsetting. Thus, the third-quarter pork production estimate is reduced 75 million pounds this month. Third-quarter cattle slaughter is also a little lower than expected but average slaughter weights are recovering faster than anticipated. Third-quarter beef production is unchanged from last month but fourth-quarter output is boosted by carryover of a few cattle from the summer and the heavier weights.

Fourth-quarter broiler production is up slightly as egg sets and chick placements are exceeding expectations. Egg producers continue to increase their flocks and the fourth-quarter egg production estimate is increased slightly. With egg prices lower than expected, the estimates for the third and fourth quarters are down from a month ago.

Stocks of dairy products are larger than expected and the estimate for the beginning of 1993/94 is raised. Commercial use of dairy products on a skim-solids basis is weaker than forecast. Projected 1993/94 net removals on a skim-solids basis are increased. Milk prices in 1993/94 likely will be a little weaker than earlier forecast.

APPROVED:

Wardell C. Townsend Jr.

ACTING SECRETARY OF AGRICULTURE

MEDIUM & SHORT GRAIN				
Harvested acres (mil.)	0.75	0.76	0.77	0.77
Yield (pounds/acre)	6,426	6,738	6,496	6,456
Beginning stocks (mil. cwt)	11.7	12.9	14.9	15.8
Production	48.3	51.0	50.3	50.0
Supply, total 5/	60.5	64.1	66.2	67.3
Domestic & residual 3/	32.2	32.8	35.7	35.3
Exports 6/	15.4	15.5	16.5	16.5
Use, total	47.6	48.3	52.2	51.8
Ending stocks	12.9	15.8	14.0	15.5

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 1991/92- 1.4; 1992/93- 1.5; 1993/94- 2.0. 3/ Residual includes unreported use, processing losses and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Marketing-year weighted average price received by farmers. 5/ Includes imports. 6/ Exports by type of rice are estimated.

NOTE: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic States of 5.45 million bales in 1991/92 and 3.95 million in 1992/93. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Cote d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

NOTE: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic States of 4.2 million bales. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Cote d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

Stocks to use ratio 10/	15.3	16.7	12.4	12.4

1/ Fiscal years beginning Oct. 1. Puerto Rico not included. 2/ Historical data are from ASCS, "Sweetener Market Data." 3/ The 1993/94 beet sugar production forecast is based on forecast sugar beet production in the Sept 9 "Crop Production" report. Sugar recovery from beets, excluding net additional sugar from the desugarization of molasses, is the 1988-92 average excluding the high and low years. Net additional sugar from desugarization of molasses is forecast at 217,000 STRV. 4/ The 1993/94 cane sugar production forecast is based on forecast sugarcane production in each state in the Sep 9 "Crop Production" report, less estimates of production for seed. Hawaii is adjusted to obtain a fiscal year estimate. Sugar recovery from cane is the 1988-92 average for each state, excluding the high and low years. 5/ Actual arrivals under the quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. The 2-year tariff rate quota for 1992/93 and 1993/94 is 2.5 million STRV. 6/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty). Imports of flavored sugar and other products with very high sugar content are not included. The estimated sugar content of imports of selected sugar-containing products in 1991/92 was about 175,000 STRV, including 70,000 tons entered under Section 22 import quotas. 7/ Includes shipments to Puerto Rico. Other exports are mostly reexports. 8/ Transfer to sugar containing products for reexport, for polyhydric alcohol, and feed. 9/ CCC disposal for domestic nonfood use, and residual. 10/ Ending stocks for 1992/93 include about 158,000 tons of sugar in excess of 1992/93 marketing allotments (188,000 tons of beet sugar production in excess of allotments, less forecast exports of 30,000 tons). If excess stocks are excluded, the stocks to use ratio is 15.0 percent.

Note: Tables on pages 29-31 present a 12-year record of the differences between the September projection and the final estimate. Using world wheat production as an example, changes between the September projection and the final estimate have averaged 11.4 million tons (2.2%) ranging from -30.7 to 8.6 million tons. The September projection has been below the estimate 7 times and above 5 times.
