WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture

Washington, D.C.

Approved by the World Agricultural Outlook Board

WASDE-294 - September 12, 1994

HIGHLIGHTS

WHEAT: Projected U.S. 1994/95 ending stocks are down from last month because of a 25-million-bushel reduction in the spring wheat crop. Projected total use is unchanged as larger exports are offset by smaller feed and residual use. The projected price range is up 20 cents on each end to $3.10 to $3.60 per bushel.

Projected 1994/95 global production and use are down from a month earlier, but because of a stocks drawdown, use is down less than production. Projected 1994/95 ending stocks are more than 15 percent below a year earlier and the lowest since 1981/82. Much of the month-to-month drop in stocks is in Canada and Australia. Australia's 1994/95 ending stocks and marketing year exports are each down 1 million tons because of a 1.5-million-ton drop in the prospective crop and a 500,000-ton reduction in carryin stocks. Canada's crop and carryin stocks also are down this month, and total use is up, reducing projected ending stocks by 2 million tons. Global imports are up from last month as a 3-million-ton increase for China more than offsets smaller prospective demand in Pakistan, Korea, and North Africa. The United States and Canada will benefit from larger global imports and smaller Australian supplies.

COARSE GRAINS: Forecast 1994 U.S. corn production of 9.26 billion bushels is up 43 million bushels from last month and is 2.9 billion above last year. The sorghum crop, however, is down from last month. Projected 1994/95 ending stocks of corn are down 60 million bushels from last month as the larger crop is more than offset by reduced carryin stocks, larger exports and larger domestic use. Projected exports are up 25 million bushels for both 1993/94 and 1994/95, while the 1994/95 feed and residual is raised 50 million bushels to offset the lower feed and residual use of sorghum and wheat. The projected price range for corn is up 5 cents on each end to $2.00 to $2.40 per bushel.

Projected global 1994/95 production is up from last month as larger crops in the United States, India, Canada, Ukraine and Thailand more than offset smaller crops in the EU, Belarus and the Baltic States. Much of the reduction in the projected 1994/95 global ending stocks is in the United States and the EU. U.S. export prospects for corn are improved this month because of a reduction in France's corn production and exports and larger forecast imports by South Korea. With wheat prices rising relative to corn, South Korea's feeding industry is expected to use more corn and less wheat.

RICE: U.S. 1994/95 supplies are projected higher this month because of higher carryin stocks and a larger crop. Record yields are forecast to result in a record crop, 1 percent above last month and 22 percent above 1993/94. Projected domestic use and ending stocks are increased from last month. The projected 1994/95 U.S. price range is raised 25 cents on each end to $5.25 to $6.75 per cwt, reflecting stronger world prices. With reported 1993/94 ending stocks higher than forecast last month, domestic and residual use is reduced. The 1993/94 export estimate is lowered 1 million cwt.

Projected 1994/95 global rice production and ending stocks are up from last month. A larger crop in Japan accounts for most of the increase.

OILSEEDS: Forecast U.S. soybean production is up this month to a record 2,316 million bushels (63 million tons). World soybean production is projected at a record 127.2 million metric tons, off less than 1 percent from last month but up 10 percent from last year. A sharp reduction in India's soybean crop and smaller reductions for Brazil, Argentina and Mexico reduce foreign soybean output to 64.2 million tons, 2 percent below a month earlier and 3 percent below last year. Excessive rainfall in India has reduced area and significantly lowered yield prospects. In Brazil, much tighter credit, reduced input purchases and lower producer prices are cutting area and yield prospects. Global production of rapeseed is projected at a record 29.9 million tons, 2 percent above last month and 12 percent above last year, mainly because of Canada's record rapeseed crop.

U.S. exports of soybeans and soybean products are raised for both 1993/94 and 1994/95. U.S. export prospects for 1994/95 are being helped by reduced soybean meal export prospects for India. U.S. soybean oil export prospects in 1994/95 are raised reflecting a reduced estimate for Malaysia's palm oil crop.

U.S. soybean crush forecasts are raised for both 1993/94 and 1994/95 because of stronger soybean meal exports. With larger supplies offsetting use gains, 1994/95 soybean ending stocks are unchanged.

U.S. season-average soybean and soybean meal prices are unchanged this month, while soybean oil prices are forecast higher at 22.5 to 25.5 cents per pound.

SUGAR: U.S. sugar production in fiscal year 1994/95 is projected at a record high 7.84 million short tons, raw value, up 60,000 tons from last month and 4 percent higher than 1993/94. The revised forecast is based on sugar beet and sugarcane production estimates released in today's Crop Production report. Forecast imports in 1994/95 are reduced and ending stocks are increased slightly.

LIVESTOCK, POULTRY, DAIRY: The U.S. meat production forecast for 1994 is up slightly from last month as slightly larger beef and broiler output more than offsets a little less pork. Average dressed weights for cattle are higher than anticipated and they likely will continue above earlier expectations for the next several months. Third-quarter broiler output will be larger than forecast last month as the number slaughtered and the average weight exceed expectations. On the other hand, average weights of hogs are a little lighter than expected and the third quarter production estimate is reduced slightly. Price estimates for cattle, hogs and broilers are reduced slightly for the remainder of 1994, because prices are a little weaker than expected. Turkey prices, however, are higher than expected and the forecast is increased. Meat production and price forecasts for 1995 are little changed from last month.

Milk supply, use and price forecasts for 1993/94 and 1994/95 are little changed from last month.

APPROVED (8:30 a.m. release):

Eugene Moos

ACTING SECRETARY OF AGRICULTURE

****

The next issue of this report will be released on October 12, 1994.

This report was prepared by the Interagency Commodity Estimates Committees and approved by the World Agricultural Outlook Board, Gerald A. Bange, Acting Chairperson (202) 720-8651. Contact committee chairpersons at (202) 720-9805.

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

1/ Fiscal years beginning Oct 1. Puerto Rico not included. 2/ Historical data are from ASCS, "Sweetener Market Data." 3/ Forecast for 1994/95 is based on sugar beet production in the Sept. 12 "Crop Production" report. Sugar recovery from beets is the projected linear trend for 1982-93. Net additional sugar from desugarization of molasses is forecast at 235,000 STRV. 4/ Forecast for 1994/95 mainland is based on sugarcane production in the Sept. 12 "Crop Production" report, forecast percent of cane harvested for sugar, and sugar recovery from cane equal to the 1989-93 average excluding the high and low years for each state. Hawaii forecast is based on information from knowledgeable sources. 5/ Actual arrivals under the tariff rate quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. Forecast imports under quota in 1994/95 assume a shortfall of 83,000 tons from the quotas covering fiscal years 1993, 1994, and 1995. 6/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty). 7/ Mostly reexports and shipments to Puerto Rico. 8/ Transfer to sugar containing products for reexport, for nonedible alcohol, and feed. 9/ Residual.

Approved by the World Agricultural Outlook Board WASDE-294 - September 12, 1994

COTTON HIGHLIGHTS

The U.S. cotton outlook for 1994/95 is highlighted this month by prospects for continuing strong demand, but slightly smaller production and stocks. The 1994 crop is still forecast at a record 19 million bales, down 1 percent from August indications. Both projected mill use of 11 million bales and exports of 7.3 million are unchanged this month. With smaller output, prospective ending stocks of 4.4 million bales are down 2 percent from last month.

Slightly larger production and stocks feature this month's 1994/95 world cotton revisions. Production is forecast at 86.2 million bales, marginally above last month. Consumption and trade are projected near August indications. This season's ending stocks of 29.5 million bales are revised up 3.5 percent this month, but remain 1 percent below the beginning level.

APPROVED (3:00 p.m. release):

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Includes imports. 4/ Reflects the difference between ending stocks based on Bureau of Census data and the previous season's supply less total use. 5/ Domestic measure, cents per pound; metric measure, dollars per kilogram. 6/ USDA is prohibited from publishing cotton price projections.

Note: Tables on pages 29-31 present a 13-year record of the differences between the September projection and the final estimate. Using world wheat production as an example, changes between the September projection and the final estimate have averaged 11.3 million tons (2.2%) ranging from -30.7 to 8.9 million tons. The September projection has been below the estimate 7 times and above 6 times.
