WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture
Economic Research Service
Foreign Agricultural Service

Approved by the World Agricultural Outlook Board

WASDE-287 - February 10, 1994

HIGHLIGHTS

Prospective world cotton supplies are tighter this month, with smaller crops indicated for China, Pakistan, India and Australia. The U.S. cotton export outlook is improved and 1993/94 carryover stocks are projected at 4.2 million bales, down from 4.5 million last month. The U.S. soybean crush is up but exports and residual use are down more, pointing to slightly higher soybean carryover stocks of 155 million bushels. Projected sugar stocks of 1.28 million tons are down slightly, mainly due to lower imports.

U.S. 1993/94 carryover stocks of corn are placed at 777 million bushels, slightly lower than last month because of stronger food and industrial use. Also, the pace of wheat food use suggests a little larger total for 1993/94, shaving carryover stocks to 588 million bushels.

U.S. meat production still is projected to increase 2-1/2 percent in 1994, to a record level.

GRAINS

WHEAT. Global 1993/94 production and ending stocks are up from last month, but projected trade and consumption are down. The larger production is concentrated in Ukraine, Kazakhstan, Russia and Australia. Most of the changes in projected trade, use and stocks are also in the countries of the former Soviet Union (FSU). Lower livestock inventories and mixed feed production indicate feed use in the FSU is likely to be smaller than projected earlier.

Projected U.S. 1993/94 ending stocks are down 10 million bushels from last month as larger food use more than offsets higher prospective imports. Reported mill grind in December was sharply above a year earlier, pushing the total food use to date above the corresponding period in 1992/93. The projected price range is unchanged at $3.10 to $3.25 per bushel.

COARSE GRAINS. Projected 1993/94 global production, use and trade are down from last month, but ending stocks are up slightly. Although prospective production is up 1 million tons in South Africa, reductions in Russia, Kazakhstan and Ukraine are more than offsetting. Despite the lower output in the countries of the FSU, needs for livestock feeding are down from earlier expectations and projected imports are lower than last month.

Projected U.S. 1993/94 corn ending stocks are down 25 million bushels from last month because of higher prospective food and industrial use. The projected price range for corn in unchanged at $2.55 to $2.75 per bushel. Projected ending stocks for barley and oats are up from last month because of smaller prospective exports of barley and larger imports of oats.

RICE. Projected 1993/94 global rice production, consumption and ending stocks are down marginally from last month, while global exports are up slightly. U.S. 1993/94 supply and use projections are unchanged from last month. The projected price range is down 25 cents on each end to $8.00-$9.50 per cwt.

OILSEEDS

World oilseed production in 1993/94 is projected at 223.7 million tons, up nearly 0.6 million tons from last month but down 3 million from last year's record outturn. U.S. production is unchanged this month at 57.7 million tons, 16 percent below last year. Foreign production is projected at a record 166.0 million tons, up 5 percent from 1992/93. Increased projections for China's soybean and peanut crops are raised 1 million and 0.5 million tons respectively, based on official area estimates.

World oilseed trade and crush prospects are increased this month, mainly for soybeans and rapeseed. A 0.4-million-ton increase in soybean exports for China is offset in part by a 0.3-million-ton reduction in U.S. soybean exports. Other significant changes include a reduction in EU soybean use and reduced soybean imports of 0.2 million tons. Rapeseed exports by Canada and EU imports are raised by 0.2 million tons each. Canada's projected rapeseed exports of 2.8 million tons are record high.

In the United States, strong year-to-date use of both soybean meal and soybean oil prompt a rise of 10 million bushels in 1993/94 U.S. soybean crush to 1,240 million bushels. Soybean exports and other uses are adjusted down by 15 million bushels, leaving ending stocks 5 million bushels higher at 155 million. Other significant U.S. changes include a lower soybean oil extraction rate estimate, an increase in domestic consumption and a further drawdown in soybean oil ending stocks.

Season-average soybean price prospects are reduced this month to a range of $6.25 to $6.75 per bushel. Soybean meal prices are cut as well to $185 to $205 per short ton, based mainly on weakening export demand trends. Soybean oil prices are increased slightly to 27.0 to 29.0 cents per pound, based on a tightening supply/use balance.

COTTON

Global cotton stocks for 1993/94 are again revised down slightly this month as smaller output more than offsets a modest reduction in consumption prospects. Production is projected at 79.2 million bales, 1.5 percent below a month earlier, primarily reflecting reduced crops in China, India, Pakistan and Australia. World use also is adjusted down nearly 1 percent to 85 million bales due to further weakness in Russia's textile activity. Russia's cotton consumption this season is revised down 12 percent on the heels of a 15-percent downward adjustment for 1992/93, reflecting indications of smaller cotton fabric production. Global cotton trade during 1993/94 is forecast down slightly to about 25.5 million bales. Ending stocks are projected at 32.7 million bales, down 2 percent from last month.

U.S. cotton export prospects continue to improve as foreign supplies shrink and policies in several major producing countries--notably Pakistan, India and Turkey--are now aimed at restricting exports in order to support their domestic textile industries. As a result, this season's U.S. shipments are projected at 6.5 million bales, up 5 percent from last month and 25 percent above 1992/93. With mill use unchanged at 10.2 million bales, ending stocks are projected to total 4.2 million bales, down 7 percent from month-earlier indications and 10 percent below a year earlier.

SUGAR

U.S. sugar production in fiscal year 1993/94 is projected at 7.54 million short tons, raw value, unchanged from last month. U.S. sugar imports under the tariff rate quota are projected at 1.125 million tons, down 40,000 from last month because some countries will be unable to fulfill their quotas.

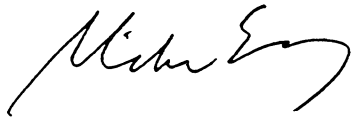

U.S. exports of sugar, projected at 590,000 tons, include 480,000 tons of reexports, 80,000 tons shipped to Puerto Rico, and 30,000 tons of domestic sugar exports. Projected domestic deliveries of sugar are revised to 9.20 million tons, down 25,000 from last month. The revision is based on the relatively low level of deliveries in October-December. Ending stocks, projected at 1.28 million tons, are down slightly from last month's forecast and, if realized, would be the lowest since 1989/90.

LIVESTOCK, POULTRY AND DAIRY

Projected U.S. total meat production for 1994 is down slightly from last month, but it is still expected to be record large. The beef production forecast is down slightly from last month. The January cattle survey showed a smaller calf crop than indicated in mid-1993. This smaller 1993 calf crop means there will be fewer animals available for feedlot placements this year than anticipated earlier. The pork and poultry outlook is little changed from last month.

Milk production prospects are unchanged from last month. Commercial disappearance of skim solids is stronger than expected and the commercial use estimate is boosted this month. Estimated CCC net removals for 1993/94 are down with the stronger use forecast. With recent milk prices higher than expected, projected prices are higher this month. The stronger disappearance of skim solids and reductions in milk output in the upper Midwest are supporting prices.

APPROVED:

SECRETARY OF AGRICULTURE

Use, total	112.4	124.8	119.1	119.1
Ending stocks	13.0	21.6	11.4	11.4
MEDIUM & SHORT GRAIN				
Harvested acres (mil.)	0.75	0.76	0.81	0.81
Yield (pounds/acre)	6,426	6,795	6,590	6,590
Beginning stocks (mil. cwt)	11.7	12.9	15.8	15.8
Production	48.3	51.6	53.0	53.0
Supply, total 5/	60.5	64.8	70.4	70.4
Domestic & residual 3/	32.2	35.9	34.0	34.0
Exports 6/	15.4	13.0	28.5	28.5
Use, total	47.6	48.9	62.5	62.5
Ending stocks	12.9	15.8	7.9	7.9

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 1991/92- 1.4; 1992/93- 1.5; 1993/94- 2.0. 3/ Residual includes unreported use, processing losses and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Marketing-year weighted average price received by farmers. 5/ Includes imports. 6/ Exports by type of rice are estimated.

1/ Marketing year beginning September 1 for soybeans; October 1 for soybean oil and meal. 2/ Prices: Soybeans, marketing year weighted average price received by farmers, for Oil, simple average of crude soybean oil, Decatur, for Meal, simple average of 48 percent, Decatur.

ERS begins electronic distribution of a new monthly publication, Oil Crops Update, on February 14. Release time is 3:00 p.m. ET. Oil Crops Update analyses factors affecting U.S. supply and demand for soybeans and other oilseeds. It may be accessed using the ERS Autofax system, (202-219-1107 from your fax machine; request document ID #2302); CALL ERS/NASS bulletin board (800-821-6229 or 202-219-0377); INTERNET (call Jim Horsfield at 202-219-0012); or USDA's Computerized Information Delivery Service, (call 202-720-5505).

Note: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic states of 5.45 million bales in 1991/92 and 3.95 million in 1992/93. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

Note: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic states of 4.0 million bales. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

Stocks to use ratio	15.3	18.4	13.3	13.1

1/ Fiscal years beginning Oct 1. Puerto Rico not included. 2/ Historical data are from ASCS, "Sweetener Market Data." 3/ The 1993/94 forecast is based on crop year sugar production in the Jan 12 "Crop Production, 1993 Summary" report, except Hawaii cane sugar which is an Interagency Sugar Estimates Committee forecast. 4/ Actual arrivals under the quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. The 2-year tariff rate quota for 1992/93 and 1993/94 is 2.5 million STRV. Estimated arrivals assume a shortfall of 40,000 tons. 5/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty). Imports of flavored sugar and other products with high sugar content are not included. The sugar content of selected sugar containing products imported in 1992/93 was about 225,000 STRV. 6/ Mostly reexports and shipments to Puerto Rico. 7/ Transfer to sugar containing products for reexport, for nonedible alcohol, and feed. 8/ Residual. 9/ In 1992/93 include 29,000 tons of sugar in transit.

Note: Tables on pages 29-31 present a 12-year record of the differences between the February projection and the final estimate. Using world wheat production as an example, changes between the February projection and the final estimate have averaged 2.7 million tons (0.5%) ranging from -7.3 to 6.8 million tons. The February projection has been below the estimate 9 times and above 3 times.
