WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture
Economic Research Service
Foreign Agricultural Service

Approved by the World Agricultural Outlook Board

WASDE-269 - August 12, 1992

HIGHLIGHTS

Reduced U.S. wheat export prospects, coupled with a larger U.S. crop, point to 1992/93 carryover stocks of 652 million bushels, up from 521 million last month. Projected U.S. corn stocks of 1,803 million bushels are up from 1,516 a month ago, mainly because of increased U.S. crop prospects.

A larger U.S. soybean crop this month points to 1992/93 carryover stocks of 320 million bushels, above 285 million projected a month ago. Cotton stocks are projected at 4.1 million bales, above the 3.5 million of last month because of a larger crop. U.S. sugar production is indicated higher this month, with the increase surpassing better domestic use prospects.

U.S. meat production is projected to increase 2 percent in calendar year 1993, well below the rise of nearly 3-1/2 percent in 1992, with the rate of increase slowing considerably for pork. Commercial use of milk in 1992/93 is likely to rise faster than milk production, and lower CCC net removals are projected.

GRAINS

WHEAT. Projected 1992/93 global production is down from last month as continued drought-related reductions in Europe and lower plantings in Australia and Argentina more than offset higher prospective crops in the United States and China. Higher projected U.S. stocks largely offset reductions in the EC and Canada. Projected exports are reduced for Australia, Argentina and the United States, while imports are down for China and South Korea.

Forecast 1992/93 U.S. wheat production is up 103 million bushels from last month, largely because of a record spring wheat crop. While the projected feed and residual is up 25 million bushels, exports are down 50 million because of the lagging export and sales pace. Thus, projected 1992/93 ending stocks are 135 million bushels above last month and the price range is down 25 cents on each end to $2.80 to $3.20 per bushel.

COARSE GRAINS. Projected 1992/93 world production is down from last month, but ending stocks are up. Higher prospective crops in the United States only partially offset reductions in Europe, the former USSR and Brazil. The United States accounts for the rise in projected 1992/93 global ending stocks.

U.S. 1992/93 corn production is forecast at almost 8.8 billion bushels, up 312 million from last month, as a dramatic turnaround in conditions led to forecast record yields. Larger crops are also forecast for the other feed grains, especially sorghum. Although projected corn exports for 1992/93 are up 50 million bushels, the larger crop results in a 287-million-bushel rise in corn ending stocks. The price range is down 15 cents on each end to $1.85 to $2.25 per bushel.

RICE. Global 1992/93 rice supply and use projections are largely unchanged from last month. For the United States, the 1992 crop is slightly larger than indicated last month. However, this is more than offset by a lower forecast carryin, reducing 1992/93 ending stocks by 3.5

million cwt. The 1992/93 price range is up 25 cents to $6.50 to $7.50 per cwt. Larger 1991/92 exports account for the reduced carryin.

OILSEEDS

World oilseed production is projected at a record 225.2 million tons for 1992/93, up 1 percent from last month and 2 percent from last year. Upward revisions for U.S. oilseed crops account for this month's rise, more than offsetting decreased foreign production. U.S. oilseed output is forecast at 65.8 million tons, up 5 percent from July indications and the largest U.S. crop since 1985/86. Record soybean yields account for much of the increase. Much-above-normal rainfall and below-normal temperatures in July and early August have been highly beneficial for yields. The U.S. soybean crop is forecast at 56.6 million tons, up 2.8 million tons from last month. Foreign oilseed output is projected at 159.4 million tons, down slightly from a month ago. Reductions in oilseed crop estimates for the former USSR and Eastern Europe more than offset increases for soybeans in Brazil and Indonesia.

World and U.S. soybean crush and exports are increased this month for both 1991/92 and 1992/93. Increased use and demand prospects, mainly in the EC and Mexico, are lifting U.S. soybean and soybean meal exports. Lower U.S. prices are a factor but strong economic recovery in Mexico is sparking more livestock feeding. U.S. soybean meal use for 1992/93 is also raised as feeding profitability remains attractive.

Larger U.S. soybean crushings are adding to record soybean oil inventories. Soybean oil ending stocks are projected to reach 2.6 billion pounds in 1992/93 despite a likely doubling of soybean oil exports from 1990/91 levels.

U.S. soybean ending stocks are projected to show only a small gain in 1992/93. U.S. soybean season-average prices in 1992/93 are projected to range from $5.00 to $5.70 per bushel, compared with $5.60 per bushel in 1991/92. Soybean oil prices are projected to range from 16.5 to 19.5 cents per pound, while soybean meal is projected to range between $160 and $180 per short ton, down only slightly from previous estimates.

COTTON

The world cotton outlook for 1992/93 is about unchanged this month although stocks are revised up based on projections for slightly larger production and smaller use. Output is expected to total 93 million bales, marginally above July indications as a larger U.S. crop more than offsets reduced crop prospects in the former USSR. Projected global use of 88 million bales is modestly below a month earlier but still record high. Even so, trade this season is expected to hold near 1991/92's 23-million-bale level as consumption growth will be concentrated in the major producing countries of China, Pakistan, India and the United States. World ending stocks are projected at 43 million bales, up 2 percent from July and 11 percent above the carryin level.

The U.S. cotton outlook for 1992/93 features moderately larger stocks than envisioned a month ago. Production is forecast at 16.5 million bales, up 3 percent from the July projection. Forecast output is 6 percent below 1991, reflecting in large part abandoned acreage in Texas. Prospects for mill use and exports remain unchanged at 9.7 million bales and 6.7 million bales, respectively. As a result, ending stocks are expected to total 4.1 million bales, moderately above last month's projection and slightly above the estimated beginning level.

SUGAR

Projected U.S. sugar production in fiscal year 1992/93 is revised up 150,000 tons this month to 7.75 million short tons, raw value, based on this year's first survey-based forecast of sugar beet and sugarcane production. The fiscal year projection includes 4.15 million tons of beet sugar and 3.6 million tons of cane sugar. Projected Louisiana sugar output is increased to a record 1 million tons, while Florida's is lowered to 1.76 million tons.

Forecast sugar deliveries in 1991/92 are revised up to 8.875 million short tons, 1.2 percent above 1990/91, on the basis of higher than anticipated deliveries in the second half of the fiscal year. A 1.4-percent increase in deliveries to 9.0 million tons is anticipated for 1992/93. Activity under the sugar reexport program includes a significant downward revision in reexports of refined sugar in 1991/92.

LIVESTOCK, POULTRY AND DAIRY

Growth in U.S. beef, pork, broiler and turkey output will push total meat production to another record in 1993. Beef production is projected to increase about 1 percent, with small increases in both fed cattle and cow slaughter. Pork producers' returns are being squeezed this year as production increases around 8 percent and hog prices run sharply below those of a year earlier. The increase in pork production is expected to slow to about 1 percent in 1993. Broiler production is expected to increase about 5 percent in 1992 and around 4 percent next year. Turkey production is expected to increase about 3 percent this year and 2 percent in 1993, sharply slower gains than seen in the late 1980's.

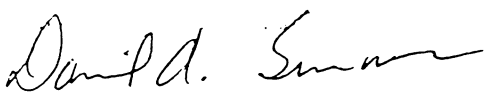

The outlook for the U.S. balance of trade in meats is optimistic. Red meat and poultry exports will increase in 1992 and further increases are anticipated next year. Imports of red meats are down this year and another decline is projected for 1993. Insignificant quantities of poultry meat are imported.

Projected 1993 average prices for fed cattle, hogs, broilers and turkeys are little changed from the anticipated 1992 averages. Hog prices in 1992 will be down sharply from the 1991 average but fed cattle, broiler and turkey prices likely will be little changed from their year-earlier levels.

Increased egg production in 1992 is resulting in lower egg prices and a squeeze on producer returns. Little change in production is expected in 1993 and prices are projected higher.

U.S. milk production in 1992/93 is projected to increase about 1 percent from the year-earlier level. Commercial use, rebounding this year from the weak levels of 1990/91, is expected to continue increasing in 1992/93. The all-milk price may average around $13.30 per cwt in 1991/92, up sharply from a year earlier. Prices are expected to continue above the year-earlier level in first half 1992/93, then drop below in the last half of the year. CCC net removals are projected to decline in 1992/93 after having increased this year.

APPROVED:

ACTING SECRETARY OF AGRICULTURE

Ending stocks	11.7	10.3	12.1	10.7

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 1990/91, 1.4; 1991/92, 1.4; 1992/93, 1.4. 3/ Residual includes unreported use, processing losses and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Marketing-year weighted average price received by farmers. 5/ Includes imports.

1/ Fiscal years beginning Oct. 1. 2/ Historical data are from NASS, "Sugar Market Statistics." Puerto Rico not included. 3/ Actual arrivals under the quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. The tariff rate quota for 1991/92 is set at 1,527,000 short tons. Projected arrivals assume a shortfall of 30,000 tons. 4/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty), plus arrivals from Puerto Rico. 5/ Includes shipments to Puerto Rico. Other exports are mostly reexports. 6/ Transfer to sugar containing products for reexport, and to polyhydric alcohol. 7/ CCC disposal for domestic nonfood use,

Note: Tables on pages 29-31 present a 11-year record of the differences between the August projection and the final estimate. Using world wheat production as an example, changes between the August projection and the final estimate have averaged 13.1 million tons (2.6%) ranging from -32.1 to 10.7 million tons. The August projection has been below the estimate 6 times and above 5 times.
