WORLD AGRICULTURAL SUPPLY AND DEMAND ESTIMATES

United States Department of Agriculture
Economic Research Service
Foreign Agricultural Service

Approved by the World Agricultural Outlook Board

WASDE-285 - December 9, 1993

HIGHLIGHTS

World wheat production prospects are up slightly this month. Crop prospects are improved in Australia but reduced for Argentina. Higher U.S. exports of wheat in 1993/94 are suggested by the pace of U.S. export sales and shipments to date, and projected stocks of 642 million bushels are down 40 million from last month.

The outlook for U.S. corn calls for carryover stocks of 886 million bushels, up marginally from a month ago but less than one-half of beginning stocks. Soybean stocks next October 1 are projected at 165 million bushels, 5 million below last month, because of continuing strong domestic demand for soybean meal and oil.

Projected cotton stocks of 4.9 million bales are unchanged from last month. Reported October 1, 1993, sugar stocks are adjusted upward this month.

The outlook continues for about 3 percent larger U.S. meat supplies in calendar year 1994.

GRAINS

WHEAT. Global 1993/94 supply and use projections are up slightly from last month. A larger crop is expected in Australia, but adverse weather has cut yield prospects in Argentina. Thus, forecast exports are larger for Australia but smaller for Argentina. Prospective EC exports to non-EC countries are down 1 million tons, but forecast U.S. exports are up. Higher projected 1993/94 world ending stocks largely reflect upward revisions in carryin stocks for Canada and the EC.

Projected U.S. 1993/94 ending stocks are down 40 million bushels from last month as a 50-million-bushel rise in prospective exports more than offsets a 10-million-bushel reduction in food use. The projected price range is up 15 cents on the low end and 10 cents on the top end to $3.00 to $3.20 per bushel.

COARSE GRAINS. Projected global 1993/94 production and ending stocks are down slightly from last month, but trade is up. Projected global production in aggregate is down only marginally from last month. However, there are numerous country and regional production and trade changes.

Many countries are adjusting to tight U.S. corn supplies and higher prices by buying alternative grains from other countries. Korea is expected to buy more feed wheat and less corn, while Japan is purchasing more sorghum (largely from the Sudan) and less corn. Also, prospective global trade in barley is up because the EC, Canada and Australia have large exportable supplies.

Because of the recently signed North American Free Trade Agreement (NAFTA), projected corn imports for Mexico are up 1 million tons for 1993/94. However, since Mexico's feed grain supplies are relatively large, forecast sorghum imports are down 1 million tons from last month.

U.S. 1993/94 corn supply and use projections are largely unchanged from last month. Recent prices have been higher than expected and the projected price range is up 10 cents on the low end to $2.45 to $2.75 per bushel. Projected sorghum exports are down 50 million bushels from last month, but projected feed and residual use is up by a like amount. Projected imports of barley are up 10 million bushels, and are reflected in higher feed and residual use.

RICE. Projected global 1993/94 rice supply, use and ending stocks are nearly unchanged from last month. Smaller forecast output in Thailand is more than offset by larger crops in Pakistan and Vietnam. Global trade is nearly unchanged as smaller projected exports from Burma and Thailand are nearly offset by larger exports from China, Egypt, India and Pakistan. U.S. 1993/94 supply and use is unchanged from last month.

OILSEEDS

World oilseed production in 1993/94 is projected at 222.9 million metric tons, down 0.6 million from last month and 3.7 million below last year. U.S. production is placed at 58.7 million tons, essentially unchanged from last month but down nearly 10 million from last season. Foreign production is projected at a record 164.2 million tons, off 0.6 million from last month but up 6 million tons from last year. Production declines for the EC's sunflowerseed, Canada's rapeseed and Pakistan's cottonseed more than offset improved prospects for soybean crops in Brazil and India. Brazil's soybean crop is increased to 23.3 million tons, from 23.0 last month, as rapid planting progress points to larger area. Generally good soybean growing weather in India has contributed to improved yields and the crop is projected to reach a record 4.5 million tons.

World 1993/94 oilseed crush is down slightly from last month but up about 1 percent from last year. Prospective increases in the soybean crush about offset reductions for other oilseeds. Soybean crush estimates are raised for Brazil, Argentina, India and the United States. U.S. crush is projected at 33.5 million tons or 1,230 million bushels, up slightly from a month ago because of strong domestic soybean meal and soybean oil demand.

World and U.S. trade in soybeans and other oilseeds is little changed from last month. However, larger foreign soybean crush is adding to foreign supplies and exports of soybean meal, mainly from South America and India. U.S. soybean meal exports are forecast at 4.4 million metric tons, down 4 percent from last month and down 21 percent from last year.

U.S. and global ending stocks of both oilseeds and vegetable oils for 1993/94 are projected lower than last month and sharply below the peak levels of recent past years. U.S. soybean oil inventories in 1993/94 are dropping to only 1 billion pounds, the lowest since 1985. The projected stocks-to-use ratio would be the lowest since the early 1970's.

U.S. season-average prices for soybeans are unchanged this month at $6.00 to $7.00 per bushel, but are above last year's $5.60. Soybean meal prices are forecast at $185 to $220 per short ton, off $5 from last month, while soybean oil prices are forecast 1 cent higher at 24.0 to 27.5 cents per pound.

COTTON

Global cotton stocks for 1993/94 are revised down slightly this month as smaller production more than offsets a slight reduction in use. The crop is projected at 81.2 million bales, 2 percent below a month earlier, reflecting smaller output in Pakistan, China and several countries of the former Soviet Union (FSU). Global consumption is revised down 1 percent to 86 million bales, as textile activity slows in Pakistan and a number of FSU countries. Smaller world use also is resulting in a modest reduction in trade to 26.2 million bales. Ending stocks are projected at 33.7 million bales, compared with 34 million last month.

The U.S. cotton outlook for 1993/94 is unchanged this month. The crop continues to be forecast at 16.3 million bales. With total use still pegged at 16.2 million bales, this season's ending stocks are projected at 4.9 million bales.

SUGAR

U.S. sugar production in fiscal year 1993/94 is projected at 7.35 million short tons, raw value, down 50,000 tons from last month. The revision is based on lower cane sugar output in Louisiana, Florida and Hawaii. In Louisiana, where more than three-quarters of the cane crop has been harvested, the production forecast is reduced from 880,000 tons to 850,000 tons because recovery of sugar from cane is well below the average of recent years. The reductions in Florida and Hawaii, to 1.72 million tons and 680,000 tons, respectively, are based on data released today by the National Agricultural Statistics Service which indicate slightly lower than anticipated production of cane for sugar.

Beginning stocks in 1993/94 are revised up to take account of 159,000 tons of sugar in transit between cane sugar mills and refineries. Projected domestic deliveries of sugar are unchanged at 9,225,000 tons, up 1.8 percent from the slightly revised figure for the last fiscal year. Ending stocks, projected at 1.1 million tons, are up 100,000 tons from last month's forecast but, if realized, would be under the recent low of 1.2 million tons in 1989/90.

LIVESTOCK, POULTRY AND DAIRY

U.S. total meat production is forecast to increase nearly 1.5 percent in 1993 and around 3 percent in 1994, little changed from last month's estimates. The 1993 pork production estimate is up slightly as hog slaughter and weights recently have been heavier than anticipated. Projected first-half 1994 broiler production is up marginally from a month ago as the hatchery supply flock and chick placements continue to increase more than expected.

Milk supply, use and price prospects are little changed from last month.

Yield (pounds/acre)	6,426	6,738		
Beginning stocks (mil. cwt)	11.7	12.9	15.8	15.8
Production	48.3	51.0	47.9	47.9
Supply, total 5/	60.5	64.1	65.2	65.2
Domestic & residual 3/	32.2	35.3	34.0	34.0
Exports 6/	15.4	13.0	23.5	23.5
Use, total	47.6	48.3	57.5	57.5
Ending stocks	12.9	15.8	7.7	7.7

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 1991/92- 1.4; 1992/93- 1.5; 1993/94- 2.0. 3/ Residual includes unreported use, processing losses and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Marketing-year weighted average price received by farmers. 5/ Includes imports. 6/ Exports by type of rice are estimated.

Note: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic states of 5.45 million bales in 1991/92 and 3.95 million in 1992/93. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

Note: Reliability calculations at end of report.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ For foreign countries, reflects cotton lost or destroyed in the marketing channel; for the United States, reflects the difference between ending stocks based on Bureau of Census data and implicit stocks based on supply less total use. 3/ World trade expanded to include estimated trade among the 12 Republics of the former USSR and three Baltic states of 4.0 million bales. 4/ Less than 5000 bales. 5/ Includes Egypt, Sudan, and Turkey in addition to the countries and regions listed. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Brazil, and Paraguay. 8/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, and Thailand.

Stocks to use ratio	15.3	18.4	10.3	11.4

1/ Fiscal years beginning Oct. 1. Puerto Rico not included. 2/ Historical data are from ASCS, "Sweetener Market Data." 3/ The 1993/94 forecast is based on forecast sugar beet production in the Nov 9 "Crop Production" report, and an Interagency Sugar Estimates Committee (ISEC) forecast of sugar recovery from beets. 4/ The 1993/94 forecasts for Florida and Texas are based on forecast production of sugarcane for sugar in the Dec 9 "Crop Production" report, and the 1988-92 average sugar recovery from cane for each state, excluding the high and low years. For Hawaii and Louisiana, sugar production in 1993/94 are ISEC forecasts. 5/ Actual arrivals under the quota with late entries and quota overfills assigned to the fiscal year in which they actually arrived. The 2-year tariff rate quota for 1992/93 and 1993/94 is 2.5 million STRV. 6/ Quota exempt imports (for reexport, for polyhydric alcohol, from Canada, and high-duty). Imports of flavored sugar and other products with very high sugar content are not included. The estimated sugar content of imports of selected sugar-containing products in 1992/93 was about 225,000 STRV, including 80,000 tons entered under Section 22 import quotas. 7/ Includes shipments to Puerto Rico. Other exports are mostly reexports. 8/ Transfer to sugar containing products for reexport, for nonedible alcohol, and feed. 9/ Residual. 10/ Ending stocks for 1992/93 include sugar in excess of marketing allotments, as well as 159,000 tons of sugar in transit.

Note: Tables on pages 29-31 present a 12-year record of the differences between the December projection and the final estimate. Using world wheat production as an example, changes between the December projection and the final estimate have averaged 4.6 million tons (0.9%) ranging from -10.2 to 6.1 million tons. The December projection has been below the estimate 7 times and above 5 times.
